DockinaBox® Floating Dock Kits

Two Different types of kits available:

1. Residential kit 4'-6' wide by 10'-16' long (small to medium lakes with moderate waves)
2. Heavy Duty Kit 4'-10' wide by 10'-16' long (bigger lakes with medium to large size waves)

Our kits come with all the brackets and hardware required and are made from rugged galvanized steel components. Kits come with plans and a material lists so that you can build your own floating dock with minimal time and effort.

30.

Floating Lift

- Lifting weights from 2,000-30,000lbs
- Lifetime warranty on the poly tubes
- Great in deep water or soft bottom applications
- Polylift works in certain situations when regular lifts don't

31.

Dockside Lift

- Made from 6061-T6 Marine Grade Aluminum
- Large winch wheel for easy lifting
- Dock Plate is fully adjustable for desired wheel height
- Nylatron rollers used on cradles provide smooth, clean, trouble-free operation. No lubrication is necessary
- 5' angled carpeted wooden bunks. Optional foot is available to provide support if hoist is installed on a removable dock
